

# Refractory for your KÖB boiler

**For the optimal and efficient operation of your boiler**

The refractory bricks in the combustion chamber are critical to protecting the boiler and should be regularly inspected and replaced as needed to ensure smooth operation and long-term efficiency of your boiler.

## Example of a complete refractory change Pyrot\* / Vitoflex 300-RF

before

after

Special sets have been put together for the Pyrot\* boilers, containing all the relevant molded bricks and the necessary accessories to ensure a smooth replacement and to guarantee the long-term efficiency of your system.

## Example of a complete refractory change Pyrotec / Vitoflex 300-UF\*

before

after

Standard parts lists have been created for the fireclay linings of Pyrotec\* boilers, but each offer is individually tailored to your system. Depending on the severity of the damage, the offer may differ from the standard, for example if additional damaged insulation plates need to be replaced or if you also need a new ash pan.
